

**Title:** Software Design Engineer

**Description:** BrightArrow Technologies is currently seeking a Software Design Engineer with experience in large-scale hosted real-time software using C# and ASP.NET

Although we are based in Bellevue, WA, we are open to this person working out of their home elsewhere in the U.S.

**Responsibilities:** Design, develop and maintain a variety of the company's hosted software solutions and mobile apps. Responsibilities include design, development and maintenance of the company's main product lines plus customer-specific customizations.

**Requirements:**

- C# / ASP.NET experience.
- Proven fundamental knowledge of large-scale and robust software design and development techniques.
- Track record of developing complex, reliable systems from concept through delivery, and maintenance.
- Background of strong team collaboration.
- Passion and fortitude to solve the most difficult problems.
- Success at developing user-friendly web and app user interfaces.
- Experience with SIP/RTP (especially FreeSWITCH and OpenSIPS) a plus.
- Motivation to wear many hats, with the innate ability to prioritize and succeed while multi-tasking a variety of projects.
- A deep empathy for customers, and a drive to resolve customer issues and requests quickly.
- Four-year or advanced degree in software engineering, computer science, or related field.

**About BrightArrow Technologies**

BrightArrow Technologies is a powerful and feature-rich mass notification system designed to automatically deliver messages simultaneously to large groups of people. This powerful notification solution is loaded with features that deliver voice calls, text messages, emails, social media posts and push notifications seamlessly in a single action. BrightArrow covers the bases with over 20 years of extensive and comprehensive development and state-of-the-art voice and messaging technology, delivering one of the most reliable and fastest adapting notification platforms in the marketplace.
